There is a constant challenge for interpreters these days to get more and better information from our data in smaller and smaller time frames. The ASEG invites you to join us for a full-day workshop on the 24th of August to hear the vendors and industry alike demonstrate the latest interpretation workflows.

An open forum discussion will be held at the end of the day to give everyone a chance to discuss what is happening in the industry at the moment as well as what they would like to see implemented in the future. The presenters include companies such as Schulmberger, Paradigm, Petrosys, Landmark, Seisnetics, Conoco Phillips, Woodside, Shell and others.

Your registration includes morning tea, lunch and afternoon tea as well as access to a small exhibition by our sponsors.

If you would like to attend please fill out the following [registration](#) and return to the ASEG WA branch.

Check out the [ASEG website](#) for more details closer to the date.
