Anne Tomlinson

ASEG Service Certificate

Perth, Feb 2015

CITATION (PREVIEW):

An ASEG Service Certificate for distinguished contributions by a member to the ASEG is awarded to Anne Tomlinson, through her involvement in and contribution to the WA Branch committee, Federal Committee, ASEG Conferences, and other ASEG activities over many years.

Anne studied at the University of Auckland graduating with a BSc in Geophysics in 2002 and MSc in Geology in 2004. She became an Active Member of the ASEG in 2003, and has actively participated in the WA Branch activities since moving to Perth in 2005. She became a member of the WA State branch committee in 2009 and served as President over several years. During this term, she was involved in the organisation of special meetings and events, including WA's Junior Geophysicists Forum. Student nights in Western Australia have grown strong with Anne's leadership. She implemented a joint society committee comprising ASEG, PESA, AIG and ESWA representatives to organise the major annual Careers in Geoscience event. She has also organised numerous ASEG talks for state meetings and annual general meetings held in Perth, and was an organiser of ASEG's Airborne Electromagnetic Workshop in 2012.

Anne has made significant contributions to the management of the ASEG, and her efforts have resulted in transformations to the WA branch, as well as other important contributions including management of the WA branch events on the ASEG website, introducing an online event registration system, and establishing regular e-newsletters. In 2014, she led the WA committee to terminate the Branch's management contract with the existing secretariat, resulting in substantial cost savings to the state branch.

Anne always worked extremely hard to achieve goals and has given a huge amount of her time to ASEG. Anne has also dedicated a significant amount of personal time to the AIG organisation, particularly in her role as Federal Councillor for Membership, a position which she has held since 2012.
