

Join us at the Advancing Earth Observation Forum 2020

A new forum with a difference!

—Incorporating the Drones for Remote Sensing (UAS4RS) Conference—

The Inaugural Advancing Earth Observation Forum is inclusive of the whole Australian earth observation (EO) community, irrespective of your application, career stage, and whether you are an earth observation user, researcher, producer or a data, tools or service provider.

The Forum focus is to advance our industry's capacity and reputation.

As a delegate..

You will be informed by national and international experts and be an integral and active part of an innovative and interactive program that promotes the key objectives of Earth Observation Australia Inc. – Communication, Collaboration, Cooperation, Inclusiveness and Diversity.

As a sponsor..

You will help grow our industry, ensure research and development support end-user needs and ultimately, advance Australia's capability and reputation in the international earth observation community.

Sponsorship opportunities are available from \$50,000 as the Forum Founder or Launch Sponsor to \$1,800 as a refreshment break sponsor.

[Expressions of interest and more information](#)

As a presenter..

Your interests and expertise will shape our program. Share your ideas and needs with all sectors of the EO community. Connect with potential partners, help shape policy, and learn what others are doing.

Abstracts are now open for:

- Workshop proposals (limited number)
- Pechakucha (rolling 20 slides, each 20 secs.)
- Interactive poster (90 second pitch)
- Technical session presentations (15 minutes including Q&A).

[Submission guidelines](#)

Keep informed through..

- [Joining our mailing list](#)
- Visiting the forum website: www.earthobsforum.org

This is the event the earth observation community has called for and delivers on a key initiative of the [Australian Earth Observation Community Plan 2020](#) – a plan developed **by** the EO community **for** the EO community.
