

RECORD OF TEACHING OF EXPLORATION GEOPHYSICS AT LA TROBE UNIVERSITY

Department of Geology (later Earth Sciences) opened in 1972. Geophysics teaching began in 1986. Closure of department, with most staff made redundant, commenced in 2002 and completed in 2005.

From	To	Name	Position	Teaching	Research
1986	1992	Bill Downey	Lecturer	Geophysics for geologists (exploration and solid-earth geophysics)	Palaeomagnetism applied to archaeology and volcanology
1993	2003*	Bob Musgrave	Lecturer/Senior Lecturer	Geophysics for geologists (exploration and solid-earth geophysics). Honours/postgrad teaching in plate kinematics. Shallow subsurface geophysics for environmental studies. Also First Year geology, palaeontology, climate change, geological mapping.....	Palaeomagnetism, rock magnetism of gas hydrates, rock magnetism and remanence anomalies of sulphides (pyrrhotite and greigite), tectonics, marine geophysics

*Redundant as of 1 March 2003. Continued to teach Geophysics for Geologists until last 3rd Year class at end of 2004.
